

1 METHOD AND SYSTEM FOR PROVIDING INFORMATION RECORDING
2 SERVICE, AND RECORDING MEDIUM AND COMPUTER PROGRAM PRODUCT
3 THEREFOR

4 ABSTRACT

5 Provides an efficient information recording service, such as
6 a printing service, for electronic data that is read or
7 distributed. An example embodiment includes a printing
8 provider computer, a vendor computer and a client computer
9 are connected to the Internet. Upon the receipt of a
10 request from the client computer, the vendor computer
11 transmits, to the client computer, display data that
12 includes anchor information used for establishing a link
13 with the printing provider computer. When a printing service
14 request button that is correlated with the anchor
15 information on the display is selected, the printing
16 provider computer accepts the printing application, displays
17 an application input screen, and obtains client information.
18 The printing provider computer also obtains a print file,
19 prints the data and transmits the obtained printed material
20 in accordance with the client information.
